EMPLOYMENT HISTORY

Lead UX/UI Designer

Targit Business Intelligence. Tampa Florida   **May 2012 to July 2014**
Work in R&D directly with the CTO developing new software products and features to improve and expand our suite of Business Intelligence Products.

Designed and Developed Responsive UX/UI Prototypes for major releases of our Windows software and client software for iOS, Android and later Windows Phone. Created complete design languages and themes for our family of products and instructed the development teams on implementing the new products or features. Helped implement the new UX/UI into iOS and Android by working directly on the source code and committing work to SVN servers.
Designed a new UX/UI for our Windows Server products and produced source files and instructions for the development teams.

Helped implement the new UX/UI with the development team located in Denmark, using Delphi, Visual Studio, and committing to SVN servers.

Designed, prototyped, and tested new features for future releases.

Developed a Help System for the new Windows Release complete with videos and step by step instructions.

Designed a UI for a web based Social Analytics Web App.

Designed and Deployed a company App Store.

Designed new features, created prototypes, instructed and directed the engineering department on implementing the new features.

Lead Web Developer & IT Manager	**Digital Technology Group - Tampa Florida**	**June 2009 to April 2012**

Developed an eCommerce System and continued to scale it and add features as the company grew to sell around 15 million per year thru this website. This system was built using PhP, MySQL, FedEX Api, Ingram Micro Api, JavaScript, BluePrint CSS, Yahoo Grids, Perl, and ASP.

Deployed an eCommerce system using X-Cart on dedicated Red Hat Server.

Implemented Real Time credit card processing, terms, and Bonus Point System.

Designed and Developed a product database housing thousands of products with SKUs, weights, descriptions, long descriptions, tier pricing, product photos, specs, comparison tables, wholesale pricing, MAP pricing, and real time stock and availability per warehouse using PHP and MySQL with some jQuery.

Developed a real-time drop ship system integrated with Ingram Micro allowing customers to choose their closest warehouse.

Designed and Developed a custom CRM system for the sales department with live data feeds from the store's orders data, shipping tracking numbers, credit card vault & transaction processing, shopping cart data, inventory data from multiple warehouses, PCI Compliance.

Deployed and Managed Linux Web Servers, MySQL and Windows Active Directory Servers.

Lead Web Developer & UX/UI Designer	**Digital Minds - Saint Petersburg Florida**	**Jan 2000 to June 2009**

Specialized in developing custom shopping cart systems, eCommerce system, CRMs, ERP Systems built using Ruby on Rails and Ext JS.

Developed a business directory called bizzspot.com for the Better Business Bureau and designed a catalog of themes based on services in the yellow pages.

Developed Custom Booking Systems for Skydiving Locations, Airplane Rides, and Wind Tunnels built with PHP MySQL, Java Front End with popup calendars, and a waiver system that filled in customers names and generated a PDF ready for print and sign.

Integrated and configured Zimbra Mail Servers as an alternative to Exchange.
Sold website design, domain names, email, hosting, and authorize.Net
Designed Small business shopping cart systems integrated with a Windows product called Cart It.

Art Director   **Signs USA - Tampa, Florida**   **Feb 1995 to Dec 1999**
Large Format Lab   *Ran a large format digital printing lab, calibrated monitors and printers using a method called Color Management.*

Managed a team of graphic designers large format printers.
Operated RIP Stations both Hardware and Software responsible for sending post script and image information to large printers.
Designed high resolution images, proofs, and photos.
Performed Color Management, and Color Profiling.
Produced large format prints at high volume.
Worked with high end advertising agencies.

Education   Purdue University, West Lafayette Indiana.   1994
EET/Computer Science
